Subject Index of Volume 72

Acetic acid
photocatalytic reduction of carbon dioxide to methane and acetic acid by an aqueous suspension of metal-deposited TiO_2, 269
Acetonitrile
production of singlet oxygen ($^1\Delta_g$ O_2) by 9,10-dicyano-anthracene and acridine: quantum yields in acetonitrile, 1
Acridine
production of singlet oxygen ($^1\Delta_g$ O_2) by 9,10-dicyano-anthracene and acridine: quantum yields in acetonitrile, 1
fluorescence of acridine and acridine 9-carboxylic acid in anionic micelles, 225
Acridine 9-carboxylic acid
fluorescence of acridine and acridine 9-carboxylic acid in anionic micelles, 225
Alcohols
acetone-sensitized photolysis of 5-iodouracil and 5-iodo-uridine in aqueous solution in the presence of alcohols: free radical chain mechanism, 197
Anionic micelles
fluorescence of acridine and acridine 9-carboxylic acid in anionic micelles, 225
Anthraquinone
photochemical degradation of cholesterol induced by anthraquinone, 189
Antioxidants
a kinetic chemiluminescence study of the antioxidants evolved from polymeric materials into the gaseous phase, 73
Aromatic hydrocarbons
solvent and temperature effects in the electron transfer quenching of triplet states of aromatic hydrocarbons by nitrobenzenes, 117

1,2,3-Benzotriazole
photoreactivity of octacyanotungstate (IV) with 1,2,3-benzo-triazole; kinetics and mechanism of the reaction, 29
Bovine serum albumin
spectroscopic investigation of the pyrene molecule adsorbed by bovine serum albumin in aqueous solution, 69

Carbon dioxide
photocatalytic reduction of carbon dioxide to methane and acetic acid by an aqueous suspension of metal-deposited TiO_2, 269
Carboxyphthalocyanines
visible and near-IR spectroscopic and photochemical characterization of substituted metallophthalocyanines, 153
Catalytic activity
comparative catalytic activity of selected metal oxides and sulfides for the photo-oxidation of cyanide, 173
Cationic dyes
photoreactions and photoinduced reactions of some cationic dyes with cyclohexanone, 217
Cholesterol
modulation of liposome matrix by cholesterol for efficient localization of photosensitizer. A fluorescence quench-ing study on chlorophyll extract from spinach leaves, 209
photochemical degradation of cholesterol induced by anthraquinone, 189
Collisional behaviour
the collisional behaviour of electronically excited germa-nium atoms, $Ge(4p^2(^1D_2))$, with simple molecules inves-tigated by time-resolved atomic resonance absorption spectroscopy in the UV, 97
Colloidal Fe_2O_3
size effect in the photochemical generation of hydrogen from water by colloidal Fe_2O_3 particles, 183
Cyanide
comparative catalytic activity of selected metal oxides and sulfides for the photo-oxidation of cyanide, 173
Cyclohexanone
photoreactions and photoinduced reactions of some cationic dyes with cyclohexanone, 217

Degradation
photochemical degradation of cholesterol induced by anthraquinone, 189
Dialkyl esters
on the photolysis of phthalic acid dialkyl esters: a product analysis study, 147
1,4-Diazidobenzene
preparation of polykis azobenzene by photolysis of 1,4-diazidobenzene with excimer laser radiation, 83
Dibenzyl ketone
singlet state photochemistry of dibenzyl ketone and its *o*-tolyl derivatives, 133
Dichlorophenols
photodegradation of dichlorophenols and trichlorophenols in TiO_2 aqueous suspensions: kinetic effects of the posi-tions of the Cl atoms and identification of the interme-diates, 261
9,10-Dicyanoanthracene
production of singlet oxygen ($^1\Delta_g$ O_2) by 9,10-dicyano-anthracene and acridine: quantum yields in acetonitrile, 1
Dimerization
visible and near-IR spectroscopic and photochemical characterization of substituted metallophthalocyanines, 153
(2,5-Dimethoxyphenyl)-arenes
intramolecular charge transfer states in a series of (2,5-dimethoxyphenyl)-arenes, 15
Dimethyl derivatives
comparative photophysical study of rose bengal, eosin Y and their monomethyl and dimethyl derivatives, 49
Dioxygen
the role of excited states in the photosensitized oxidation of substrates with dioxygen, 9
Dodecylammonium propionate
a fluorescence study of lumichrome: phototautomerism in dodecylammonium propionate reversed micelles, 235

cis-Enediol formation
photochemical reaction of 2,2′-pyridyl — *cis*-enediol formation in ethers, 41
Electron transfer
singlet–singlet intramolecular energy and electron transfer in covalently-linked porphyrin–phthalocyanine heterodimers, 163
Electron transfer quenching
solvent and temperature effects in the electron transfer quenching of triplet states of aromatic hydrocarbons by nitrobenzenes, 117
Emission spectra
a comparison of $Kr(^3P_1)$ and $Kr(^3P_2)$ quenching reactions, 109
Eosin Y
comparative photophysical study of rose bengal, eosin Y and their monomethyl and dimethyl derivatives, 49
Ethers
photochemical reaction of 2,2′-pyridyl — *cis*-enediol formation in ethers, 41
Excimer laser radiation
preparation of polykis azobenzene by photolysis of 1,4-diazidobenzene with excimer laser radiation, 83
Excited states
intramolecular excited state proton transfer in Mannich base — 3,5,6-trimethyl-2(*N*,*N*′-diethylaminomethyl) phenol, 123
the role of excited states in the photosensitized oxidation of substrates with dioxygen, 9

Fac-$Co(NH_3)_3(NO_2)_3$
solid state photochemistry of *fac*-$Co(NH_3)_3(NO_2)_3$ and *mer*-$Co(NH_3)_3(N_3)_3$ as thin films on Si(111) surfaces, 243
Fluorescence
a fluorescence study of lumichrome: phototautomerism in dodecylammonium propionate reversed micelles, 235
fluorescence properties of distorted short-chain basket handle porphyrins, 61
fluorescence of acridine and acridine 9-carboxylic acid in anionic micelles, 225
Fluorescence quenching
modulation of liposome matrix by cholesterol for efficient localization of photosensitizer. A fluorescence quenching study on chlorophyll extract from spinach leaves, 209

Germanium
the collisional behaviour of electronically excited germanium atoms, $Ge(4p^2(^1D_2))$, with simple molecules investigated by time-resolved atomic resonance absorption spectroscopy in the UV, 97

Heterodimers
singlet–singlet intramolecular energy and electron transfer in covalently-linked porphyrin–phthalocyanine heterodimers, 163
Hydrogen
size effect in the photochemical generation of hydrogen from water by colloidal Fe_2O_3 particles, 183
Hydrogen peroxide
photocatalytic effects of halogenpentaamminecobalt(III) complexes on hydrogen peroxide photolysis, 169

ILCT excited states
photophysical properties of mixed-ligand complexes $(ArS)_2ZnPhen$ with interligand charge-transfer excited states: influence of substituents in the arylthiolate ligand, 35
Intramolecular charge transfer
intramolecular charge transfer states in a series of (2,5-dimethoxyphenyl)-arenes, 15
5-Iodouracil
acetone-sensitized photolysis of 5-iodouracil and 5-iodouridine in aqueous solution in the presence of alcohols: free radical chain mechanism, 197
5-Iodouridine
acetone-sensitized photolysis of 5-iodouracil and 5-iodouridine in aqueous solution in the presence of alcohols: free radical chain mechanism, 197

Kinetic chemiluminescence
a kinetic chemiluminescence study of the antioxidants evolved from polymeric materials into the gaseous phase, 73

Liposome matrix
modulation of liposome matrix by cholesterol for efficient localization of photosensitizer. A fluorescence quenching study on chlorophyll extract from spinach leaves, 209
Long-wave region
photoreactions of poly(*o*-butyrylstyrene) in the long-wave region, 87
Lumichrome: phototautomerism
a fluorescence study of lumichrome: phototautomerism in dodecylammonium propionate reversed micelles, 235

Mannich base
intramolecular excited state proton transfer in Mannich base — 3,5,6-trimethyl-2(*N*,*N*′-diethylaminomethyl) phenol, 123
Mer-$Co(NH_3)(N_3)_3$
solid state photochemistry of *fac*-$Co(NH_3)_3(NO_2)_3$ and *mer*-$Co(NH_3)_3(N_3)_3$ as thin films on Si(111) surfaces, 243
Metallophthalocyanines
visible and near-IR spectroscopic and photochemical characterization of substituted metallophthalocyanines, 153
Metal oxides
comparative catalytic activity of selected metal oxides and sulfides for the photo-oxidation of cyanide, 173
Methane
photocatalytic reduction of carbon dioxide to methane and acetic acid by an aqueous suspension of metal-deposited TiO_2, 269
Micelles
a fluorescence study of lumichrome: phototautomerism in dodecylammonium propionate reversed micelles, 235
Mixed-ligand complexes
photophysical properties of mixed-ligand complexes $(ArS)_2ZnPhen$ with interligand charge-transfer excited states: influence of substituents in the arylthiolate ligand, 35
Monomethyl derivatives
comparative photophysical study of rose bengal, eosin Y and their monomethyl and dimethyl derivatives, 49

NIR bands
visible and near-IR spectroscopic and photochemical characterization of substituted metallophthalocyanines, 153

Nitrate
photoassisted oxidation of nitrite to nitrate over different semiconducting oxides, 55
Nitrite
photoassisted oxidation of nitrite to nitrate over different semiconducting oxides, 55
Nitrobenzenes
solvent and temperature effects in the electron transfer quenching of triplet states of aromatic hydrocarbons by nitrobenzenes, 117

Octacyanotungstate(IV)
photoreactivity of octacyanotungstate (IV) with 1,2,3-benzotriazole; kinetics and mechanism of the reaction, 29
Oxidation
regioselectivity of oxidation by positive holes (h^+) in photocatalytic aqueous transformations, 179

PBA
movement of small molecules on a silica surface: a photophysical and photochemical study, 251
Photoassisted oxidation
photoassisted oxidation of nitrite to nitrate over different semiconducting oxides, 55
Photocatalysis
photocatalytic effects of halogenpentaamminecobalt(III) complexes on hydrogen peroxide photolysis, 169
Photocatalytic aqueous transformations.
regioselectivity of oxidation by positive holes (h^+) in photocatalytic aqueous transformations, 179
Photocatalytic reduction
photocatalytic reduction of carbon dioxide to methane and acetic acid by an aqueous suspension of metal-deposited TiO_2, 269
Photochemical decomposition
photochemical decomposition of an aqueous solution of sodium sulphide, 23
Photodegradation
photodegradation of dichlorophenols and trichlorophenols in TiO_2 aqueous suspensions: kinetic effects of the positions of the Cl atoms and identification of the intermediates, 261
Photoinduced reactions
photoreactions and photoinduced reactions of some cationic dyes with cyclohexanone, 217
Photolysis
acetone-sensitized photolysis of 5-iodouracil and 5-iodouridine in aqueous solution in the presence of alcohols: free radical chain mechanism, 197
on the photolysis of phthalic acid dialkyl esters: a product analysis study, 147
photocatalytic effects of halogenpentaamminecobalt(III) complexes on hydrogen peroxide photolysis, 169
preparation of polykis azobenzene by photolysis of 1,4-diazidobenzene with excimer laser radiation, 83
Photo-oxidation
comparative catalytic activity of selected metal oxides and sulfides for the photo-oxidation of cyanide, 173
Photoreactions
photoreactions and photoinduced reactions of some cationic dyes with cyclohexanone, 217
Photoreactivity
photoreactivity of octacyanotungstate (IV) with 1,2,3-benzotriazole; kinetics and mechanism of the reaction, 29
Photosensitized oxidation
the role of excited states in the photosensitized oxidation of substrates with dioxygen, 9
Photosensitizer
modulation of liposome matrix by cholesterol for efficient localization of photosensitizer. A fluorescence quenching study on chlorophyll extract from spinach leaves, 209
Phthalic acid
on the photolysis of phthalic acid dialkyl esters: a product analysis study, 147
Polykis azobenzene
preparation of polykis azobenzene by photolysis of 1,4-diazidobenzene with excimer laser radiation, 83
Polymeric materials
a kinetic chemiluminescence study of the antioxidants evolved from polymeric materials into the gaseous phase, 73
Poly(*o*-butyrylstyrene)
photoreactions of poly(*o*-butyrylstyrene) in the long-wave region, 87
Porphyrin–phthalocyanine
singlet–singlet intramolecular energy and electron transfer in covalently-linked porphyrin–phthalocyanine heterodimers, 163
Proton transfer
intramolecular excited state proton transfer in Mannich base — 3,5,6-trimethyl-2(*N*,*N'*-diethylaminomethyl) phenol, 123
Pyrene
movement of small molecules on a silica surface: a photophysical and photochemical study, 251
Pyrene molecule
spectroscopic investigation of the pyrene molecule adsorbed by bovine serum albumin in aqueous solution, 69
2,2'-Pyridyl
photochemical reaction of 2,2'-pyridyl — *cis*-enediol formation in ethers, 41

Quenching
a comparison of $Kr(^3P_1)$ and $Kr(^3P_2)$ quenching reactions, 109
movement of small molecules on a silica surface: a photophysical and photochemical study, 251

Regioselectivity
regioselectivity of oxidation by positive holes (h^+) in photocatalytic aqueous transformations, 179
Rose bengal
comparative photophysical study of rose bengal, eosin Y and their monomethyl and dimethyl derivatives, 49

Semiconducting oxides
photoassisted oxidation of nitrite to nitrate over different semiconducting oxides, 55
Short-chain basket handle porphyrins
fluorescence properties of distorted short-chain basket handle porphyrins, 61
Si(111) surfaces
solid state photochemistry of *fac*-$Co(NH_3)_3(NO_2)_3$ and *mer*-$Co(NH_3)_3(N_3)_3$ as thin films on Si(111) surfaces, 243
Silica
movement of small molecules on a silica surface: a photophysical and photochemical study, 251

Singlet oxygen
production of singlet oxygen ($^1\Delta_g$ O_2) by 9,10-dicyanoanthracene and acridine: quantum yields in acetonitrile, 1
Singlet–singlet energy
singlet–singlet intramolecular energy and electron transfer in covalently-linked porphyrin–phthalocyanine heterodimers, 163
Singlet state
singlet state photochemistry of dibenzyl ketone and its *o*-tolyl derivatives, 133
Sodium sulphide
photochemical decomposition of an aqueous solution of sodium sulphide, 23
Spectra
visible and near-IR spectroscopic and photochemical characterization of substituted metallophthalocyanines, 153
Spectroscopic investigation
spectroscopic investigation of the pyrene molecule adsorbed by bovine serum albumin in aqueous solution, 69
Substituent effects
photophysical properties of mixed-ligand complexes $(ArS)_2ZnPhen$ with interligand charge-transfer excited states: influence of substituents in the arylthiolate ligand, 35
Sulfides
comparative catalytic activity of selected metal oxides and sulfides for the photo-oxidation of cyanide, 173
Thin films
solid state photochemistry of *fac*-$Co(NH_3)_3(NO_2)_3$ and *mer*-$Co(NH_3)_3(N_3)_3$ as thin films on Si(111) surfaces, 243
o-Tolyl derivatives
singlet state photochemistry of dibenzyl ketone and its *o*-tolyl derivatives, 133
Trichlorophenols
photodegradation of dichlorophenols and trichlorophenols in TiO_2 aqueous suspensions: kinetic effects of the positions of the Cl atoms and identification of the intermediates, 261
Triplet states
solvent and temperature effects in the electron transfer quenching of triplet states of aromatic hydrocarbons by nitrobenzenes, 117

UV
the collisional behaviour of electronically excited germanium atoms, $Ge(4p^2(^1D_2))$, with simple molecules investigated by time-resolved atomic resonance absorption spectroscopy in the UV, 97

Water
size effect in the photochemical generation of hydrogen from water by colloidal Fe_2O_3 particles, 183

Zinc arylthiolate complexes
photophysical properties of mixed-ligand complexes $(ArS)_2ZnPhen$ with interligand charge-transfer excited states: influence of substituents in the arylthiolate ligand, 35
